- **Authored the framework for various innovative high-impact House and Senate bills that help disabled and/or all vets, plus ease the military recruiting crisis, and stem illegal immigration, and boost the economy with little to no cost.** Including:
  - [Veterans Entrepreneur Act](#): Proposed to, and received overwhelming support/ sponsorship from 100% of the many top House reps and US Senators in face-to-face meetings.
    - Bill gives vets "career choice" to use their GI Bill college tuition grants to alternatively start or buy businesses, and become an *employer* (vs only an employee).
    - Also helps "defund" the heavy-left, cash-rich "university industrial complex."
    - Helps ease the military recruiting crisis, since the GI Bill is no longer the recruiting "magnet" it once was (according to my conversation with Admiral Lex Walker, of Navy Recruiting Command.) *Pilot bill is currently in HVAC committee.*
